

Discussion Questions: Academic Leadership and AI

Select one area for discussion. Consider the opportunities, challenges, and implications for academic leadership.

Academic Workforce & Labor

How might AI reshape academic work - and how can leaders help their institutions navigate changes in productivity, roles, skills, staffing, and the human experience of work?

Teaching & Learning

How might AI change what, how, where, and why students learn - and what could that mean for the roles of faculty, students, and institutions?

Research

How might AI change what we can discover, how we conduct research, and who can participate in discovery - and what could that mean for the future of the university research enterprise?

Technology Transfer

As AI accelerates discovery and innovation, how might universities rethink how knowledge moves from research into technologies, ventures, practices, policies, and other forms of societal impact?
